On the occasion of Milan Design Week 2024, Zip Zone Events proposes, for its Seventh Edition, its consolidated format of events founded on the innovative combination of Design and Art and realized in the charming location of Via Tortona 26, the heart of the Tortona Design District.

For the next edition the event consists of collective exhibitions of works of art, design elements, creative projects and innovative design products. The selective research of exhibitors has allowed us to realize a new creative context where the public will be immersed into a world that is both professional and artistic, where you can discover works by internationally acclaimed artists as well as design creations and interior decorations created by well-known and emerging talents. Thanks to the international character of the format and its exhibitors, visitors will be able to confront themselves with the different vision and creative trends of the world.
